INTRODUCTION ................................................................. i-v

FIELD TRIP: September 27, 1997
Start & End: Hyatt Regency Hotel, Lexington, Kentucky

Road Log ................................................................. 2-6
Introduction: Devonian and Carboniferous shales of eastern Kentucky ................. 7-9
Stop 1: Devonian black shales of the Huron Member of the Ohio Shale ............. 10-12
Stop 2: Mississippian sideritic gray shales of Nancy Member of Borden Formation . 13-14
Stop 3: Cyclic deposits (tidalites?) of the Pennsylvanian Breathitt Formation ...... 15-16
Stop 4: Pennsylvanian sideritic black shales of the Breathitt Formation ............ 17-18
Stop 5: Borden gray shale, Sunbury black shale, Henley gray shale,
and Farmers siltstone turbidites ....................................... 19-21
Stop 5a: Three Lick Bed and Cleveland Member of Ohio Shale .................... 22-24

CORE WORKSHOP: September 28, 1997
Venue: Hyatt Regency Hotel, Lexington, Kentucky

Technical Paper #1: Climatic origin of dm-scale compositional cyclicity
in the Upper Devonian Cleveland Member of the Ohio Shale,
central Appalachian Basin
(by J. Jaminski, T.J. Algeo, J.B. Maynard, and J.C. Hower) ................. 26-62

Technical Paper #2: Tectono-climatic controls on broad-scale patterns of
compositional variation in the Upper Devonian Cleveland Member of the
Ohio Shale, central Appalachian Basin
(by J. Jaminski, T.J. Algeo, J.B. Maynard, Thomas Kuhn, and J.C. Hower) ...... 63-77

Technical Paper #3: The utility of X-Radiography for generation of high-
resolution paleoclimatic proxy records from black shales, with examples
from core shale members of Upper Pennsylvanian Midcontinent cyclothems
(by T.J. Algeo, D.L. Hoffman, J.B. Maynard, M.M. Joachimski,
J.C. Hower, and W.L. Watney) .................................. 78-102

Technical Paper #4: Environmental reconstruction of anoxic marine systems:
Core black shales of Upper Pennsylvanian Midcontinent cyclothems
(by T.J. Algeo, D.L. Hoffman, J.B. Maynard, M.M. Joachimski,
J.C. Hower, and W.L. Watney) .................................. 103-147
