UNIVERSITY OF CINCINNATI BULLETIN

ANNOUNCEMENT OF THE

Graduate School of Arts and Sciences

1952-1953

PUBLISHED BY THE UNIVERSITY OF CINCINNATI
VAN WORMER ADMINISTRATION BUILDING
CINCINNATI 21, OHIO

ENGL. 571, 572. MODERN PROSE. 15001-571, 572

ENGL. 573, 574. TWENTIETH-CENTURY FICTION. 15001-573, 574

Primarily for Graduate Students

*ENGL. 911, 912. FOREIGN BACKGROUNDS OF ENGLISH LITERATURE. 14001-911, 912

*ENGL. 931, 932. GRADUATE SEMINAR: ENGLISH LITERATURE. 14001-931, 932

*ENGL. 951, 952. GRADUATE SEMINAR: AMERICAN LITERATURE. 14001-951, 952

*ENGL. 901, 902. RESEARCH. 14001-901, 902

GEOLOGY AND GEOGRAPHY

Head of Department: Professor JOHN LYON RICH, Room 29, Old Tech Building; Professors CASE, BARBOUR, COULTER; Associate Professors RITTENHOUSE†, CASTER, FREY†; Assistant Professor SUNDERMAN; Instructors DURRELL, BOWERS, FRIEDMAN, WOLF.

This Department offers work in geology leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy, and work in geography leading to the degree of Master of Arts.

Not all students admitted to graduate courses are accepted as candidates for degrees. Personal acquaintance and preliminary examinations are required in order to determine their aptitude for self-directed effort. With an adequate basis of undergraduate study it may be possible to finish the work for a master's degree in one year, but the requirement cannot be stated in terms of time or credits. All graduate students will be required to participate in an annual three- or four-day field trip.

The thesis required for the master's degree may represent either original research, or a compilation and analysis of the literature on the chosen subject, of such a nature as to demonstrate the student's ability to sum up existing knowledge and to organize and express it in an approved manner.

GEOLOGY

For Graduate and Advanced Undergraduate Students

GEOL. 109. ANCIENT LIFE. 15040-109

GEOL. 209. GEOLOGY OF MINERAL RESOURCES. 15040-209

*Given every year.

†Absent on leave

- 15
- *GEOL. 301, 302. MINERALOGY. 15040-301, 302
GEOL. 310. TOPOGRAPHIC MAPPING. 15040-310

15041-410
- *GEOG. 420. POLITICAL GEOGRAPHY. 15041-420

Primarily for Graduate Students

- *GEOG. 977, 978. ADVANCED INDIVIDUAL WORK IN GEOGRAPHY.
14041-977, 978

*Given every year.

GERMAN

Head of Department: Professor EDWIN H. ZEYDEL, Room 228, McMicken Hall; Professor MERKEL.

This Department offers work leading to the degrees of Master of Arts and Doctor of Philosophy.

Students electing work in this Department should have completed an undergraduate major in German or its equivalent. German 301, 302 and 421, 422 in the College of Liberal Arts, or their equivalents, are required.

For Graduate and Advanced Undergraduate Students

Attention is called to German 111, 112, Premedical Readings, listed in the Announcement of the College of Liberal Arts. This course will be of value to graduate students in science departments who wish to prepare for the reading examination in German given to candidates for the doctor's degree.

*GERMAN 421, 422. HISTORY OF GERMAN LITERATURE TO THE NINETEENTH CENTURY. 15010-421, 422

GERMAN 431, 432. MASTERPIECES OF GERMAN LITERATURE. 15010-431, 432

GERMAN 481, 482. ORIGIN AND DEVELOPMENT OF THE GERMAN DRAMA. 15010-481, 482

GERMAN 491, 492. GERMAN LYRICS AND BALLADS; THE NOVELLE. 15010-491, 492

GERMAN 521, 522. LESSING AND SCHILLER. 15010-521, 522

GERMAN 531, 532. GOETHE'S LIFE AND WORKS. 15010-531, 532

GERMAN 533, 534. GOETHE'S *Faust*: INTERPRETATION OF BOTH PARTS. 15010-533, 534

GERMAN 551, 552. GERMAN ROMANTICISM. 15010-551, 552

GERMAN 561, 562. HEINE AND THE YOUNG GERMAN MOVEMENT. 15010-561, 562

GERMAN 581, 582. GERHART HAUPTMANN. 15010-581, 582

GERMAN 583, 584. THE DRAMA OF REALISM. 15010-583, 584

GERMAN 591, 592. GERMAN LITERATURE OF THE TWENTIETH CENTURY. 15010-591, 592

*Given every year.

465-6. MUSIC APPRECIATION. General approaches to music and musical form and expression; trends in musical art; selected musical literature. WF 2:30-4:00. Mr. Hamilton. (Code: 18-225.)

For statements regarding credit for work in the Art Academy of Cincinnati, the Cincinnati Conservatory of Music, and the College of Music of Cincinnati, see page 36.

GEOLOGY AND GEOGRAPHY

Professors RICH (*Head of Department*, 29 Old Tech), CASE (25 Old Tech), BARBOUR (137 McMicken), COULTER (8 Old Tech); Associate Professors RITTENHOUSE* (31 Old Tech), CASTER (2-C Old Tech), FREY*; Assistant Professor SUNDERMAN (35 Old Tech); Instructors DURRELL (1 Old Tech), BOWERS (322 McMicken), FRIEDMAN (33 Old Tech), WOLF (25 Old Tech); Museum Curator HOLLAND.

Fields of concentration, leading to the degree of B.A. or B.S., are offered in geology and in geography. The beginning courses in geology are planned as broad cultural surveys of the earth and its history—the processes which shape its surface and mold its landscapes; minerals and rocks; some of the important mineral resources; and the history of development of life as revealed by the fossil record. Geol. 101-2, 111-2 is the basic course preliminary to the advanced courses in the Department.

The beginning semester of geography (Geog. 100) deals with the basic principles of location, topography, weather and climate, and major vegetational and mineral resources—all desirable for further studies in geography. On completing it, the student is permitted to enter any of the other courses in geography except Geog. 577-8.

A student wishing to major in geology shall present Geol. 101-2, 111-2 or its equivalent. He will then continue with Geol. 301-2, 321-2, 317 (318, 319), and 501-2. Further courses in geology and their sequence will depend upon the plans and the interest of the student. For all students planning geology as a profession, a five- or eight-weeks' summer field course is most strongly recommended.

A student wishing to major in geography shall present Geog. 100 or its equivalent, Geol. 101-2, 111-2 or its equivalent, Geog. 501-2. Further courses in geography and their sequence will depend upon the plans and the interest of the student.

Among the nongeological courses recommended to students who will concentrate in geology are the following (preference depending in part on fields of concentration): Chem. 101-2, 111-2; Phys. 101-2, 111-2; Zool. 101-2, 111-2, 317, 320; Bot. 101-2, 111-2, 421-2, 553-4; Geog. 410 or one of the regional courses in geography;

*Absent on leave.

mathematics through calculus; Astr. 101-2; German 001-2 and 011-2; Econ. 101-2; Phil. 121-2.

Among the nongeographical courses recommended to students who will concentrate in geography are the following: Geol. 449, 443-4, 448, 980; Hist. 107-8, 117, 207-8; Econ. 101-2; Pol. Sc. 471-2; Bot. 221-2, 925, 421-2; Soc. 301-2, 411-2, 540, 230.

Each autumn the Department conducts a three- or four-day field trip which all advanced students in the Department are expected to attend.

Five-Year Co-ordinated Program in Geology. Students looking toward a *professional career* in geology are urged to follow a special co-ordinated program (described on page 3.) especially designed to meet their needs, particularly if they intend to seek work involving applications of geology to the search for oil and gas, to mining, or to engineering. In this program, a student receives training in geology, the fundamentals of mathematics through calculus, chemistry through quantitative analysis, physics, mechanics, mechanical drawing, and surveying. Some of the work will be chosen from the "Degree" courses in engineering offered by the Evening College. All courses have been so scheduled as to provide a logical sequence of subjects and produce a uniformly distributed load. A certain latitude of choice is possible, but changes should be made only after consultation with the Head of the Department of Geology. On the satisfactory completion of four years' work, the student will receive the degree of *Bachelor of Science in Geology* and, after an additional year of successful study in the Graduate School, he will receive the degree of Master of Science. (See also page 35.) Students contemplating entering this course should consult in advance the Head of the Department of Geology and Geography who serves as their adviser throughout the course.

For interdepartmental programs including work in geography, see page 32.

GEOLOGY

15-040

101-2. INTRODUCTION TO GEOLOGY. Prerequisite to all other geology courses except Geol. 103-4, 301-2, 109, and 425-6. It is not prerequisite to any geography courses, but is required of geography majors. With Geol. 111-2, it satisfies the Liberal Arts science requirement. Geol. 101-2 and 111-2 form two parts of a single 10-credit course. With the instructor's permission, however, students who do not offer geology in fulfillment of the science requirement may take 101-2 alone. Lecture, MWF 8:30. Mr. Durrell.

- 111-2. INTRODUCTION TO GEOLOGY, LABORATORY. A laboratory course to accompany Geol. 101-2. With the instructor's permission, transfer students and other qualified students may take the course without the lectures (101-2). MW 1:30-4:30; TTh 1:30-4:30. 2 crs. each sem. Mr. Durrell and assistants.
- 105-4. GENERAL GEOLOGY. An elementary course for general students not expecting to do further work in the subject; fulfills the Liberal Arts science requirement only if taken in combination with an elementary course in another science. MW 8:30, F 1:30-4:30. Mr. Barbour.
- 501-2. MINERALOGY. Morphological relations of crystals, their physical and chemical properties. The important minerals, their occurrence, properties, and uses. Blowpipe analysis and microchemical testing. Prerequisite: High-school or elementary college chemistry. TTh 10:30, M 1:30-4:30. Mr. Friedman.
- 517, 518, 519. GEOLOGIC DEMONSTRATION TRIPS. A two weeks' field excursion immediately after spring examinations and before Summer School, generally in the Appalachian highlands. Conferences once a week during the following semester and the preparation of a comprehensive report to be submitted at the end of the first semester. Special work required for graduate credit. The three numbers designate different routes followed in successive years. Prerequisite: Geol. 101-2, 111-2 or equivalent. Mr. Durrell.
- 521-2. PRINCIPLES OF HISTORICAL GEOLOGY. An introduction to the study of the physical and biological history of the earth with particular emphasis on North America. Prerequisite: Geol. 101-2, 111-2 or equivalent. TTh 8:30, W 1:30-4:30, S 8:30-11:30. 4 crs. each sem. Mr. Caster.
350. ADVANCED GEOLOGY FIELD TRIP. A two weeks' field excursion immediately after spring examinations and before Summer School. Conferences once a week during the following semester and preparation of a comprehensive report to be submitted at the end of the first semester. For students who have already taken a Geologic Demonstration Trip (517, 518, 519) and Geol. 521-2 or its equivalent. Mr. Caster.
- 401-2. PETROGRAPHY. Principles of crystal optics and recognition of transparent minerals under the microscope. Principles of petrology and classification of igneous rocks. Hand-specimen and thin-section study. Prerequisite: Geol. 301-2 or equivalent. MW 9:30, TTh 1:30-4:30. 4 crs. each sem. Mr. Friedman.

- 425-6. INVERTEBRATE PALEONTOLOGY. A systematic survey of the important groups of invertebrate fossils with special emphasis on their zoological character and importance as index fossils. Prerequisite: Geol. 101-2, 111-2 or equivalent, or a course in biology, zoology, or botany. MW 11:30, TTh 1:30-4:30. 4 crs. each sem. Mr. Caster.
443. (1st sem.) PHYSIOGRAPHY OF EASTERN UNITED STATES. Prerequisite: Geol. 101-2, 111-2, or equivalent. Alternates with Geol. 449, to be offered in 1953-54. M 1:30-4:30 or at hours to be arranged. Mr. Barbour.
444. (2nd sem.) PHYSIOGRAPHY OF WESTERN UNITED STATES. Prerequisite: Geol. 101-2, 111-2, or equivalent. Alternates with Geol. 448, to be offered in 1953-54. M 1:30-4:30 or at hours to be arranged. Mr. Barbour.
469. (1st sem.) COMMON ROCKS. Use of megascopic characteristics to identify igneous, sedimentary, and metamorphic rocks and to interpret their conditions of origin and subsequent alteration. Prerequisites: Geol. 101-2, 111-2, and 301-2 or equivalents. Each laboratory section limited to seven students. Lecture, TTh 9:30; laboratory, F 1:30-4:30 or W 1:30-4:30.
470. (2nd sem.) BASIC SEDIMENTATION. Principles governing the transportation, deposition, and subsequent alteration of sediments, with particular emphasis on the physical and chemical environments of accumulation. Prerequisites: Geol. 101-2, 111-2, and 301-2 or equivalents. Each laboratory section limited to nine students. Lecture, TTh 9:30; laboratory, F 1:30-4:30 or W 1:30-4:30.
- 501-2. READINGS FOR SENIORS. Required of all seniors majoring in geology; not open to other students.
- 503-4. DEPARTMENTAL SEMINAR. Expected of all advanced students in geology and geography. No additional credit. Th 4:30.
- 571-2. INDIVIDUAL WORK IN GEOLOGY. Credit depends on amount of work done. May be entered either semester. Geology Staff.
589. (1st sem.) STRUCTURAL GEOLOGY. Principles of rock deformation; geologic measurements; applications of descriptive geometry; methods of determination of structure in the field, including practice in field work. This course is given once in two years, beginning in September of the even-numbered years. Prerequisite: Geol. 101-2, 111-2 or equivalent. MW 10:30, W 1:30-4:30 and three additional hours of laboratory to be arranged. 4 crs. Mr. Rich.

- *906. (2nd sem.) PETROLOGY OF IGNEOUS ROCKS. A study of the genesis of eruptive rocks. Special methods in petrology. Prerequisites: Geol. 301-2 and 401-2 or equivalents. Mr. Friedman. (Code: 14-040.)
- *909. (1st sem.) METAMORPHIC GEOLOGY. Changes produced in rocks by weathering and metamorphism, including microscopic examination of the minerals and internal structures of metamorphic rocks. Prerequisite: Geol. 401-2 or equivalent. Geol. 909 alternates with 979, to be offered in 1953-54. TTh 8:30, MF 1:30-4:30. 4 crs. (Code: 14-040.)
- *925-6. ADVANCED MEGASCOPIIC PALEONTOLOGY. By the instructor's permission. Prerequisite: Geol. 425-6 or a course in zoology. MW 8:30-10:00. Mr. Caster. (Code: 14-040.)
- *960. (2nd sem.) GROUND WATER. Principles of ground-water movement; measurement of quantity and quality. Study of supplies in selected localities. Prerequisites: Geol. 470, Phys. 101-2, or equivalents. (Code: 14-040.)
- *963-4. ADVANCED SEDIMENTATION. Methods of analyzing sediment samples; application of these methods to the identification and interpretation of sedimentary rocks. Limited to ten students. Prerequisites: Geol. 470 and 401-2 or equivalents. First semester, T 10:30, M 1:30-4:30; and one three-hour laboratory period to be arranged. Second semester, TTh 10:30, M 1:30-4:30. (Code: 14-040.)
- *980. (2nd sem.) INTERPRETATION OF AERIAL PHOTOGRAPHS. The geologic and geographic interpretation of aerial photographs, and their use in mapping. Prerequisites: Geol. 101-2, 111-2 or equivalent. Geol. 589 and 980 alternate with 561-2, to be offered in 1953-54. Lecture and laboratory. Mr. Rich. (Code: 14-040.)

Omitted during 1952-53: 109, Ancient Life; 209, Geology of Mineral Resources; 310, Topographic Mapping; 448, World Physiography; 449, Principles of Geomorphology; 561-2, Economic Geology; 910, Advanced Mineralogy; 921-2, Stratigraphic Geology; 979, Geophysics; 982, Glacial Geology.

*Primarily for graduate students. May be taken by qualified undergraduates by special permission of the instructor.
