POL 2097 INTERNATIONAL INSTITUTIONS

Spring Semester/ Maymester 2017
Department of Political Science
University of Cincinnati

Instructor: Dr. Ivan Dinev Ivanov
Class meets: Wednesdays, 3:35-6:25 pm
Location: Rieveschl 615B & Swift 519
(see attached brochure for each class location)
Study abroad component: May 10-21, 2017
(see attached brochure for detailed itinerary)
Location: The Hague and Brussels
Course’s webpage: http://homepages.uc.edu/~ivanovid/abroad2017.htm

Instructor’s contact info:
Office Hours (Spring 2017):
Mon & Wed 11 am – noon &
1:30 pm – 3:00 pm
Instructor’s Office: 1121 Crosley Tower
EMAIL: Ivan.Ivanov@uc.edu*
Office Phone: 513-556-3318
Cell Phone (in Cincinnati): 513-652-2057
Cell number (while in Brussels and the Hague): +359-885-67-4132

* I prefer to contact me via email and I should be able to respond you within 12-24 hrs.

COURSE DESCRIPTION:

International institutions have become increasingly important player in our globalized world, while also facing unprecedented challenges from various threats that include international terrorism, economic growth, global pandemic diseases, desire by countries like Britain to leave for a of international cooperation like the EU (e.g. Brexit). Institutions also impact a variety of policies in different spheres of international interaction—from regulation of the global financial markets, to terrorism and transnational justice. Through on campus discussions at UC and a study abroad trip to Brussels and The Hague, careful reading, engaged responses, and independent research, students who take this class will gain better understanding of the challenges of globalization and the institutional responses to address these threats. The research trip to Brussels and The Hague will provide the students with unique opportunities to conduct independent field research, interview officials at various international institutions, participate in various forums and discussions, and collect primary data on a topic of their interest.

STUDENT LEARNING OUTCOMES:

Students in this class will:

1) compare and contrast institutional responses across different issue areas that include economic cooperation, financial markets regulation, responses to post-conflict reconstruction, implementation of transnational justice and the dealing with the spread of infectious diseases.
2) appraise politics and policies of institutional responses to various global threats and assess various institutions’ social, political, legal and economic underpinnings.
3) encounter the functioning and management of different international institutions through participation in forums and discussions, and hearings at international courts and other institutions.
4) research, write and present findings on a question related to international institutions.

**PEDAGOGY AND EXPERIENTIAL LEARNING COMPONENTS:**

Class meetings will combine in class lectures and seminar-style discussions with time reserved for small group meetings of students doing related research topics, and critical interactions about assigned materials in light of current events around the world.

Additionally, students will design and implement policy responses by contributing to online discussion boards on Blackboard. To that end, students will need to submit five 250-300 word policy responses which should be posted in the appropriate blackboard discussion board forum (look for author’s names) by midnight on the day before the class meeting.

Students have two options: (1) they can sign up for POL 2097 (section #001, 3 credits) without participating in the study abroad program; or (2) sign up for POL 2097 (section #002, 4-5 credits) while also participating in the study abroad program. Note that our study abroad program is offered jointly with POL 5176/ 6076 (The New Europe). The New Europe is also a capstone class. Due to the structure and the content of these two offerings, students can either register for POL 2097 or 5176/ 6076 but **not for both classes**. We recommend the freshmen, sophomore, some junior students and non-majors to register for 2097 while advanced junior and senior POL and INTA students to register for 5176/ 6076. Note that 2097 fulfills the I, R; BoK: DC, SE, SS general education attributes. On some occasions 2097 and 5176/ 6076 will meet jointly, while on others the classes will meet separately.

The study abroad portion will take place in The Hague and in Brussels from May 9-21, 2017 (see the tentative schedule for details). Students who plan to participate should submit their applications no later than **October 15, 2016** if they plan to apply for Taft Undergraduate Enrichment Award (the due date he due date for Taft applications is set for November 7, 2016). For all other students the due date is **November 30, 2016**. Please contact the instructor at ivanovid@umail.uc.edu if you need additional information.

As a part of the study abroad program all students need to complete a creative group outreach project. A group of 5-7 students will work together on a 10 min creative presentation (e.g. using PowerPoint, Video or other format) that highlights three main aspects of their experience: (1) a presentation of a specific institutional policy or aspect of the trip; (2) a brief discussion how this program has enriched their scholarly knowledge on the topic and; (3) why and how the program is valuable to the UC community.

Students will be required to complete a final project that includes a final paper (10-12 pages double-spaced). Please check with the instructor for the and content of the research-based project to make sure it would be appropriate to student’s major and agreed upon with professor. Finally, course participants will need to complete in-class or on-site presentation/discussion of final project.
COURSE REQUIREMENTS AND GRADING:

Course Requirements (section 001; 3 credits):  | % of final grade | Due Date |
--- | --- | --- |
Policy responses (via Blackboard) | 35% (5x7%) | TBD |
Presentation of the final paper | 10% | 4/5-4/19/2017 |
Final paper | 40% | 5/1/2017 |
Course attendance and participation | 15% | throughout the semester |

Course Requirements (section 002; 4-5 credits):  | % of final grade | Due Date |
--- | --- | --- |
Policy responses (via Blackboard) | 15% (5x3%) | TBD |
Presentation of the final paper | 10% | 4/5-4/19/2017 |
Group outreach project | 15% | 5/31/2017 |
Participation in study abroad events and discussion | 25% | 5/9-5/21/2017 (tentative) |
Final paper | 35% | 5/31/2017 (tentative) |

Grading Scale:

- 93-100%  A  73-76%  C
- 90-92%  A-  70-72%  C-
- 87-89%  B+  67-69%  D+
- 83-86%  B  63-66%  D
- 80-82%  B-  60-62%  D-
- 77-79%  C+  0-59%  F

POLICIES AND CAVEATS:

First, if you have any medical condition or disability that affects your performance in class or limits your participation in the study abroad in The Hague and Brussels, please notify the instructor at the beginning of the semester in order to find an accommodation that meets best student’s interests. Also, for advice and assistance you may contact the university’s disability services office, located in 210 University Pavilion, Phone 513-556-6823, Email: disabisy@ucmail.uc.edu. Similarly, please notify immediately the instructor if you have concerns regarding your participation in trip to The Hague and Brussels (especially if you are facing issues/ concerns that might prevent you from participating in the program). Failure to do so on time may incur significant costs for you.

Second, the anticipated tentative cost of the trip is $2,300 and it includes lodging, local transportation (bus, metro, tram, etc) in The Hague and Brussels, a visit to SHAPE in Mons, city tours and some meals. The airfare is NOT included. Students pay most meals and other expenses. You can apply online via UC International’s website: http://studyabroad.uc.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=10202. Additionally, visit program’s webpage for further information that includes presentational information, course policies, program schedule, and stuff to do in Brussels and the Hague is available here: http://homepages.uc.edu/~ivanovid/abroad2017.htm
Third, please note that most readings are available on the course’s webpage on Blackboard. When electronic versions of readings are not available, paper or electronic copies will be distributed. Finally, I also need to remind you that all of the work you submit in this course should be your own. Students should review the UC student code of conduct and be aware of all activities defined as academic dishonesty. I do encourage students to exchange ideas and/or work together. However, unless it is a group project, each student is responsible for completing and submitting his or her own assignments. Please be advised that according to the UC Student Code of Conduct plagiarism is defined as:

1. Submitting another’s published or unpublished work in whole, in part or in paraphrase, as one’s own without fully and properly crediting the author with footnotes, quotation marks, citations, or bibliographic references.

2. Submitting as one’s own original work, material obtained from an individual, agency, or the internet without reference to the person, agency or webpage as the source of the material.

3. Submitting as one’s own original work material that has been produced through unacknowledged collaboration with others without release in writing from collaborators.

4. Submitting one’s own previously written or oral work without modification and instructor permission.

Fourth, in order to defray the cost of the study abroad program, students are encouraged to seek different sources of funding. College and UC International advisors can provide additional information for sources of financial support during 2016-17 academic year.

**COURSE READINGS:**

**Week 1 (Jan 11): class meets in Swift 519. Why Do States Cooperate? Why States Form International Institutions?**

---

*The University of Cincinnati Student Code of Conduct, approved by UC Board of Trustees, April 15, 2015; available at [https://www.uc.edu/conduct/Code_of_Conduct.html](https://www.uc.edu/conduct/Code_of_Conduct.html).
**Week 2 (Jan 18): class meets in Rievschl 615B. Understanding Threats and Institutions’ Responses: the United Nations System and the International Court of Justice (ICJ)**

**Week 3 (Jan 25): class meets in Rievschl 615B. International Legal Institutions and Transnational Justice: Ad-Hoc Tribunals and the International Criminal Court (ICC)**

**Week 4 (Feb 1): class meets in Rievschl 615B. Institutional Responses to Terrorism**

**Week 5 (Feb 8): class meets in Rievschl 615B. The European Union as a Sui Generis IO: Legitimacy and Representation of the European Parliament**

Week 6 (Feb 15): class meets in Swift 519. The European Union’s Supranational and Intergovernmental Nature: the of the European Council and the European Commission

Simon Hix and Bjorn Hoyland, The Political System of the European Union (Palgrave Macmillan, 2011); Chapters 1 and 2, pp. 1-48

Week 7 (Feb 22): class meets in Swift 519. The European Central Bank (ECB), the Financial Crisis in Europe and Its Implications

Week 8 (March 1): class meets in Rievschl 615B. Global Institutions’ Approach to Financial Crises and Economic Growth

Week 9 (March 8): class meets in Rievschl 615B. Institutions, Partnerships and NATO’s Out-of-the-Area Engagement

**March 15: Spring break (no class meeting)**

**Week 10 (March 22): class meets in Swift 519. The EU and NATO’s Role in the European Liberal Order**

**Week 11: (March 29) class meets in Rievschl 615B. Institutional Responses to Environmental Threats and Epidemic Diseases**

**Week 12 (April 5): class meets TBD. Panel Discussion #1**

**Topic: #1**

Five to seven students will present their research to their peers and instructor. NO MORE than 10 min to present their research – the topic, the focus, core debates/ puzzles and preliminary and/ or expected findings. The presentation will be followed by a short Q&A session that includes questions and suggestions how to improve the quality of this research.

**Week 13 (April 12): class meets TBD. Panel Discussion #2**

**Topic: #2**

Five to seven students will present their research to their peers and instructor. NO MORE than 10 min to present their research – the topic, the focus, core debates/ puzzles and preliminary and/ or expected findings. The presentation will be followed by a short Q&A session that includes questions and suggestions how to improve the quality of this research.

**Week 14 (April 19): class meets TBD. Panel Discussion #3**

**Topic: #3**

Five to seven students will present their research to their peers and instructor. NO MORE than 10 min to present their research – the topic, the focus, core debates/ puzzles and preliminary
and/or expected findings. The presentation will be followed by a short Q&A session that includes questions and suggestions how to improve the quality of this research.

Suggested List of Research Topics

I encourage you to discuss with the instructor the research topic before departing to Brussels. Below is a list of topics that you should consider for your final project. Note that I can provide you with guidance on these topics and be able to help you identify good research questions and otherwise assist you in the project development process. While it would be good if students pursued a wide array of topics, it is okay for more than one student to focus on a particular topic so long as they work independently and write their own papers. Additionally, you should be able to relate these topics to themes we will be encountering in the common readings I’ve assigned for the first half of the course. Please, realize that if students pick their own topic, the burden for developing the project will fall mainly on them, as I may not be well positioned to assist with readings. Students need to assess the tradeoff between having more autonomy in topic choice and taking more responsibility for any problems you encounter.

Also, when selecting the topic you should take into account several factors: First, your final project can be theory-driven or issue driven (e.g. you can choose to test one or several competing theories/ explanations in the literature to see which one offers a better explanation of a certain aspect of international cooperation). Second, you need to formulate an interesting and insightful research question. Remember the question has to flow from the existing literature and contribute to the major intellectual debates or discussions on the topic. Third, in order to formulate an interesting question and provide an insightful response, students should review and know well the existing literature on the topic. Fourth, you can choose if you want to study one or several cases, instances or institutions of international cooperation thus completing a single-case or comparative study. Here are some suitable topics for which I can provide substantial guidance. Please note that these are not listed in any particular order. All kinds of combinations are possible subject to instructor’s approval:

1. Institutional Designs, International Cooperation and Threat Response: the Case of the EU
   - Are some institutions more or less intergovernmental and/ or supranational? Are EU institutions independent or co-dependent?
   - How do EU institutions differ from national institutions? For example, you can compare and contrast EP w/ national parliaments, the Commission with National governments and the Council with both. How similar or different are they and why?
   - How has EU institutional structure changed evolved over the years with different institutional treaties?
   - The role of nation-states in the new EU institutional set up
2. European Institutions and Transnational Threats: the Role of Nationalism and Identity

- The construction of European and the (de)construction of national identities in Europe. Focus on single (e.g. the UK) or multiple case studies. Explain the difference in construction of national identities.
- The position of national governments and political parties on the future of Europe: focus on key areas such as integration and economic growth; integration and the future of common currency, and others.
- The rise of extreme parties and movements and the future of Europe: is this phenomenon temporary or lasting?

3. EU’s Response to Political and Economic Threats and its Impact on the Future of Europe

- EU foreign relations and future of the polity as a regional and global actor; focus on EU policies in the Middle East, the European neighborhood, the enlargement and others.
- Consider comparing and contrasting the European, US and trans-national/ institutional approaches/policies in different regions of the world or different topics of int’l cooperation (e.g. non-proliferation, trade, environment and others).
- Is the EU becoming a single actor/ player and power center in international relations (consider examples and cases to support your argument)?
- Is the EU challenging American primacy in the context of great power competition?
- Survey CFSP, ESDP. Why is coordination among EU members difficult to achieve?
- What is the role of EU and NATO in the future of European security? Discuss the role of membership, identity, security interests, and treaty commitments (e.g. NATO’s article 5) in shaping European security cooperation
- Study the role of national governments in shaping the European security.
- US influence and the role of transatlantic relations in European security

4. EU-US Cooperation in Response to Economic and Security Threats

- Choose areas of EU (and possibly US federal) regulation and compare and contrast them. Topic may include: transportation, security, international trade, agriculture, environment, international aid, emergency management, labor relations, etc.
- US approach to international cooperation: bilateral vs. multilateral policies. Compare and contrast various approaches used by US federal government in negotiating with the EU. When does the US prefer bilateral approach (e.g. visas and ICC Article 98 or bilateral immunity agreements) and when does it prefer multilateral approach (e.g. int’l trade, environmental policy). Why is this case?
- Focus on EU and US policies in areas of international tension (e.g. the Middle East conflict, Iraq, Iran, Libya, Darfur, Somalia, North Korea, Russia-Ukraine etc.). What are these

5. NATO, International Security and Post-Conflict Reconstruction

- Discuss how NATO has evolved over the years. Focus on different policies, strategic concepts and operations in the 1990s and 2000s.
• Survey NATO’s new missions, capabilities and membership. What is the future of the Alliance: is it still an institution of collective defense or collective security? Has it become more or less relevant and why?
• Study NATO and “the battle for consensus” within the organization. Does this structure make the Alliance more or less adaptable to the new security challenges?
• How does NATO partner with other institutions in post-conflict settings? Discuss relations with the UN, the EU and African Union? What can we learn from this study about inter-organizational cooperation?

6. International Organizations and New Threats: pandemic diseases, cyber security and others
• International institutions in managing new emerging threats: SARS, HIV/ AIDS, Ebola other pandemic diseases, viruses and public health issues. Students can choose to study one single topic or multiple topics/ issues from comparative perspective
• International institutions and their responses to cyber threats: the role of the International Telecommunications Union, ICANN and other IOs.
• Regional and national approaches to cyber threats – the role of the US, EU, NATO, China, other key players.
• Partnership between national governments and private businesses in managing cyber threats, pandemics and other threats to globalization

7. The International Courts in Transnational Justice in Response to Global Threats
• Study various legal doctrines (e.g. legal positivism, nationalism, transnational justice, etc.) and explain how these related to specific aspects of international legal cooperation.
• Evaluate ICJ’s record as a rule-maker. Is it impartial or not? Has it changed the nature of int’l law or not?
• Is ICJ an instance of trans-national or intergovernmental body? Whose interests does it represent?

8. International Norms, Transnational Institutions and Int’l Criminal Law
• The evolution and effectiveness for transnational justice from ICTY to ICC
• Compare and contrast ICTY, ICTR (Rwanda): discuss similarities and differences of what are these (an) instance(s)?
• The uneasy relationship between ICC and the United States: domestic and international factors. Focus on Article 98 agreements.
• Compare and contrast domestic and international jurisprudence: what are the difference and similarities?
• Discuss various aspects on the link between transnational justice (with focus on int’l courts and tribunals) and int’l human rights. Focus on specific cases and discuss when states choose to comply and why.
Instructions about Writing a Research Paper

These instructions can be used by students registered in POL 2097 (International Institutions) or similar courses taught by me where a final research paper is a required course component.

Selecting Research Topic and Question

For the most part I provide the students with a list of list of research topics to guide them through the selection process, so my first recommendation is to find an interesting and relevant topic (for specific examples, please check the course syllabus). Consider the following examples: the role of nationalism in European integration; child soldiers and transnational justice, national vs. supra-national regulations in different areas of international cooperation (e.g. finances, trade, consumer protection, telecommunications, etc) all of which are instances of a good research topic. Then, I urge students to ask an interesting and topical research question that bears important conceptual and theoretical implications. There are several criteria for asking a good question:

First, the question should be **interesting and exciting**. Examples include: How has the International Criminal Court (ICC) handle cases involving child soldiers? How did the U.S. and the Eurozone regulatory reforms differ in the aftermath of the 2008 financial crisis? What is the impact of Article 98 agreements on the functioning of ICC? Less interesting and exciting questions might be: “why did ICC came into existence only after 2003?,” “why aren’t the United States, Russia, China and India members of ICC?” as the answers to these questions may be fairly easy and obvious. Please, avoid simply doing an overview of the topic at hand (e.g. this is how ICC came into existence or this is a brief overview of the history of European integration) as these types of presentations don’t help us understand the complexity of the political world.

Second, you should be able to **answer your question in 10-15 pages** space provided for such a paper. Questions like “what is the impact of greater EU integration on the legitimacy of the Union’s institutions” might be very interesting and exciting but are too broad to be answered in 10-15 pages. If this is the case, then you need to narrow down your question to a specific institution/ case/ period, etc. (e.g. why earlier efforts for further security integration via EDC failed in the 1950s and of is this an instance?).

Third, you should ask an **interesting yet manageable question**. Some questions may be difficult to answer – for example what is the impact of Brexit on the future of European integration? Given the lack of data, right now or in the near future we can only speculate about the impact. However, question like “why EU citizens rejected past proposals for further integration” can be explained easier when the research compares the responses of EU citizens in different referenda across Europe who rejected further integration – for example in Denmark (1992), Ireland (2001 and 2008), France and the Netherlands (2005), etc. Then, the researcher can find common themes and draw generalizable conclusions.

Fourth, a question should be **theoretically driven** but also should have **practical and policy implications**. For example, the rejection of further EU integration may be justified with
concerns about migration and national identity (i.e. nationalism), challenges for economic development (greater integration leads to increased job insecurity), social disparities in the aftermath of greater economic integration, or domestic politics (i.e. citizens use referenda as a non-confidence vote against existing governments or political elites). The answer to this question has also policy implications related to what should policy makers and elites do to respond to or tame the public’s concerns while also enhancing the legitimacy of the democratic processes in the European Union.

Lastly, a student’s research question can be fairly new or under-researched (e.g. the role of child soldiers in ICC’s caseload) or could be a widely asked question in the literature for which the student can offer a novel perspective/answer. For example, the role of international institutions on democratization of newly admitted member states has been widely studied with majority of research showing that these institutions tend to consolidate democracy. However, if the student can use examples or case studies to show this relationship is far more complex (e.g. that sometimes state feign democratization to obtain access to int’l organizations and then do business as usual once the join them), this could be a very interesting and promising research project.

**Conducting Research**

While the process of conducting research and collecting data involves different steps and stages, students should keep in mind two elements: (1) as soon as they sort out the research topic, there is an initial research stage when they need to go to the library and survey the literature on the topic as it will help them tremendously understand what has already been explained/argued and what gaps exist in the literature; (2) once students have a better idea about various explanations, they should engage in the collection of data and/or evidence about the question at hand. There are two types of sources from which data can be collected: primary sources (i.e. original data collected by the researchers via interviews, observation, from databases, or other ways of collecting sources/data) and secondary data which have previously been collected by another (credible) scholar/researcher and can be used with proper citation. The second stage can be done before, during and after the study abroad trip.

Below are a few tips to maximize the research process (both in terms of survey of literature and data collection):

- When surveying the literature (books, articles, chapters, etc.), make sure to take notes indicating the source, the page and the type of information (both the theoretical argument and the examples/evidence presented in the existing literature).
- When doing initial research make sure to note which books, articles and other relevant sources are available at UC libraries, Ohio Link and which are available solely at specialized libraries (e.g. the Peace Palace Library or the European Commission’s library). Once we get to these libraries, you can maximize the time by focusing on sources available only there.
- Feel free to schedule open or semi-structured interviews with experts, specialists, academics, scholars, etc. Ask a question and let them walk you through their perspective. Use various meetings (including those that are a part of your study abroad
program) to ask questions (feel free to follow up with the presenters during or after the meetings) in lieu of semi-structured interviews.

Presenting Your Research
An early presentation of the research project is key for the author to put at test whether they can communicate their ideas with others (peer colleagues, the course instructor, journal editors, etc). To that end, I require or at least strongly encourage students to present their research project before the paper is finalized (even before the data collection process is completed). The research presentation is an opportunity for the author to gain a better understanding of the question that they ask and the answer(s) that they offer. It is also a chance for them to improve the quality of their own work by collecting feedback from peers, the course instructor, and possibly other faculty. Don’t hesitate to ask question and be open to criticism and suggestions as these are intended to improve your research.

Consider the following tips for your research presentation:

- Plan no more than 10-12 min presentation
- Make sure to highlight the research question(s), the expected answer(s) and findings and why your research matters (i.e. why it is important)
- Feel free to use PowerPoint or another software to present your work as visuals are helpful albeit not required. Please, don’t use excessive visuals or special effects as these can distract from the point(s) in your presentation.

Writing the Research Paper
Please, note that your paper should contain several standardized sections outlined in separate sub-headings/ sub-titles across the paper. If you are not sure how these should be worded or presented, simply look at some of the articles that you use for your own research. Note that these sub-headings/ sub-titles can have different names but must contain the following content elements:

- **Introduction** – this is the place to introduce the puzzle/ the problem of your research, formulate the research question and outline alternative hypotheses/ explanations. An interesting opening sentence or paragraph that draws on contemporary or historic event know to the public which is also of relevance for your study may be a good way to introduce the research problem.
- **Literature Review** – in this section students are expected to elaborate in detail what the existing literature says on the topic, what are the main debates and what are the exiting gaps (i.e. what is missing from current research).
- **Theory and Methods** – this is the section where the author justifies how they are going to come to the finding(s)/ assertion(s) made at the end of the paper. The process involves the use of qualitative and/ or qualitative data or possible a comparison between and/ or among several cases. In case you choose to conduct a case study, you need to justify why you have selected the particular one or several cases (consider most similar vs. most different cases; also within and between case comparison, etc.).
• **Cases/Observations** – in this section(s) the evidence from the cases is presented in a structured way using specific criteria, variables, etc. If multiple cases are compared, it is important that the presentation(s) follow the same template.

• **Conclusion** and implications for the research. This section has several functions: (1) the author should be able to summarize the findings and their relevancy. In our earlier example about the referenda in the EU, an interesting finding would be that referenda that reject further integration may be due to domestic unpopularity of the governing party or coalition and not directly related to the issue of further EU integration. If this is the case, the author should highlight that this finding challenges dominant explanations about EU integration (e.g. the fatigue/globalization/nationalism, etc. explanations). It offers a new perspective of explaining EU’s unpopularity (the domestic variable) and suggests that such referenda may be impractical in the future as their outcomes are driven by factors unrelated to the process of EU integration (e.g. the popularity of the governing coalition).

**Using References**

Lastly, a frequently asked question is about the correct reference/citation style. By and large, political scientists prefer to use the Chicago-Turabian style (a.k.a. the footnote citation style). It is especially preferred for scholars of international relations. Footnotes are usually presented at the bottom of the page (not at the end of the text). However, I am cognizant that many of the students are used to the MLA citation style (parenthesis citation). There are also many academic journals in Political Science using the MLA citation style and I will accept it, too. Those of you who choose to use the MLA style, should make sure to include a full alphabetized list of references at the end of your research paper.

**How many sources should students use?**

While I don’t have a hard rule about the exact number of sources, I would expect each research paper to incorporate at least 15 peer reviewed sources – these include articles, books, chapters in edited volumes -- published by reputable sources (university presses, major commercial publishers, research institutes, etc.). You can also use other sources (web, non-peer reviewed academic or policy publications, official websites or publications of int’l organizations, etc.). Note that Wikipedia-type sources should not be used as these can be edited by anyone and are not subject to rigorous review by scholars in the field.

**Selected Academic Journals on Topics of International Institutions:**
