Q7 - Please enter any comments about the professor in the box below:

Faculty: Donglu Shi

Response Rate: 64.71% (11 of 17)

- 1 Very knowledgeable in the topic and always willing to start discussions based on a students question.
 The slides were made of hand written pages which were very hard to understand. The method of delivery could have made more attractive. The TA took away marks once showing reasons that was hardly relatable to the question. Overall, delivery method was not much praiseworthy.
- 2 The professor really cares about the material he is teaching and is interesting to listen to.
- 3 The material was taught in a way to help with understanding and application rather than memorizing a bunch of equations and how to complete math with them. This makes the information a lot easier to retain for me.
- 4

- 5 Sometimes, the written on the blackboard and support materials are difficult to read. This means that the letter of professor is difficult to read. Some digitalization may be necessary.
- 6 N/A
- 7 I was surprised by how engaged I was with the materials and lectures. The professor is good at explaining the material to an audience of diverse backgrounds. At this point in my career, I have limited chemical knowledge and he was able to breakdown the concepts in a way that I could easily follow along with and understand. Plus, he got me more interested in subjects I didn't think I cared about. His slides are good material to reference back to because they contain everything he talked about in class with more detail. I loved his pre-exam reviews and the way his exercise problems prepared you to think in a similar way for the exams. Great professor.
- 8 I want to highlight the exceptional qualities of Professor Donglu Shi. He is not only a proficient teacher but also incredibly approachable and friendly. Professor Shi has a knack for making the class interactive by incorporating real-life instances into his teachings. His approachability and dedication to student engagement contribute significantly to a positive and effective learning environment.
- 9 I am delighted to share my positive experience with the teaching provided. The professor's passion for the sciences shines through in every lecture, creating an atmosphere that is both inspiring and motivational. The fundamentals are meticulously discussed, ensuring a comprehensive and enriching learning experience.
- 10 Dr.Shi is well planned about the course.The way of teaching the lecture with demo are great.
- 11 Astonished by the delivery of course material from this professor. The focus is spot on for his discussions and teaches in a revolutionary way
